## Grading of wood

A tree is like a secret package. You have some ideas of the content, but you don't know for sure what will show up. Each and single wood piece is unique.

In our manufacturing the wood is sorted and graded in different families to get specific image of the flooring. At Tarkett, we offer different wood grading:

**Select** – very uniform color with calm structure / really small knots / quarter-sawn look

**Premium** – uniform color with calm structure / small knots

**Nature** – medium color variations / medium knots / traditional look

**Original** – lively structure, medium color variations / medium knots

**Robust** – lively structure, large color variations / medium knots

**Rustic** – very lively structure with large color variations / large knots / vintage look.

Some of the brushed products in rustic grade are presented with additional photos of knots, illustrating specific characteristics of this grade.

**Thermo / Cognac** – hardwood becomes darker throughout the whole thickness

**Uni Nature** – very lively structure with large colour variations / medium knots / moderately visible sapwood / vintage look

**Uni Rustic** – very lively structure with large colour variations / large knots / visible sapwood / vintage look

**Uni Robust** – very lively structure with large colour variations / medium knots / very visible sapwood / vintage look

Our experience of more than a century long, commitment to excellence and care for customers guide us in eliminating natural wood imperfections - knot holes, bird pecks, worm holes, black spots and other cracks.

Note: Heat treatment and staining can significantly determine product visual appearance.

# IDEO

Intelligent design.  
Unconventional,  
affordable  
premium designs.

IDEO is unique product line of three strip parquet with one strip wood floor appearance. Thanks to innovative technology of applying colour, three strip parquet boards in IDEO have the look of large premium size one strip boards.

Six unconventional, affordable premium designs in nuances with gradient transition from white to light brown tone, have been created with the purpose to offer the right solution for any interior. IDEO is the floor of the future, based on intelligent design.

IDEO product line is being produced with special care of the environment and forest protection. Twice less trees are cut for production of IDEO, compared to the number of trees which would be necessary for production of conventional one strip parquet in the same dimension.

**Умный дизайн. Доступный - Неординарный - Премиальный вид**

ИДЕО от Tarkett – уникальная линейка трехполосной паркетной доски, неотличимая по дизайну поверхности от премиального массивного однополосного паркета. Среди шести превосходных, премиальных, и вместе с тем доступных по цене, дизайнов в оттенках от белых до светло-коричневых тонов найдется идеальная пара для любого интерьера.

ИДЕО – пол, созданный с заботой о будущем, в котором сохранение окружающей среды и природных источников сырья является непреложной истиной.

Коллекция ИДЕО была создана с идеей заботы об окружающей среде и защите лесов. Для ее производства срубается в два раза меньше ценной твердой древесины, чем для аналогичного дизайна однополосной паркетной доски в таком же размере.
